

SHARP[®]

solar electricity

**RESIDENTIAL SOLAR
ELECTRICITY**

BECOME POWERFUL

Fulfill the energy demands of your home with the OnEnergy™ system

The OnEnergy™ solar system by Sharp replaces the bulky look of traditional roof mounts with a unique, low-profile rack, designed to create an elegant appearance that blends beautifully with your home's roofline.

Combined with our black-framed solar modules, the OnEnergy system sets a new standard in solar aesthetics.

- **Low-profile racking system** creates a smooth, seamless, integrated finish.
- **Hidden hardware** and tapered covers contribute to the superior aesthetics.
- **More module choices** optimize energy production and allow a Sharp-certified installer to create a custom solution for your home.
- **Designed with your roof in mind**, the system can be installed on nearly any roof, including asphalt shingle, concrete flat tile and curved Spanish tile.
- **Exclusive triangular module** blends with roof lines and creates additional energy production by covering more surface area on hip roofs.

Roof-Mounted OnEnergy Solar Modules

The OnEnergy system modules are the ideal combination of technology and design. The complementary modules shown above are a great solution for hip and valley roofs.

Residential solar products

Experience, reliability and innovation from a world leader in solar

Since 1959, Sharp has led the solar electric industry with efficient, affordable systems. From the world's first solar-powered calculator to solar-powered residential and commercial applications, Sharp powers more homes and businesses than any other solar manufacturer in the world.

Today, Sharp offers more product choices so that an installer can create a system that's customized specifically for your home. And with Sharp's proven history of reliability and customer satisfaction, you can make the switch to solar with the assurance that we're here to stay. Our 25-year limited warranty is a promise you can trust.

Interested in going solar? Consult a Sharp-certified installer to select the right combination of products for you and your home.

Building-Integrated Solar Modules

Sharp building-integrated solar modules blend the power of solar electricity with the aesthetics of today's architecture and make residential solar nearly invisible.

Ground-Mounted Solar Modules

Most ground mounts feature angled modules on steel supports anchored in concrete footings. These systems are ideal for large arrays on estate properties.
